Greenhouse Offerings

- Make the best of this opportunity to grow your own veggie seeds or seedlings by starting them early in autumn and winter and enjoy delicious vegetables and herbs or stunning flowers throughout spring and summer!
- Take advantage of a unique and aesthetic greenhouse for an exceptional price.
- The greenhouse structure is made from a durable, long lasting aluminium frame that is maintenance free. The greenhouse walls are tough twin-wall polycarbonate panels that slide into the aluminium framing for strong structural support and durability. The technology is unique, designed to achieve elegant beauty to merge with your garden scenery.
- The twin-wall polycarbonate has an air pocket between the layers, acting like double-glazing on your plants. Our twin wall polycarbonate sheets are UV treated making them more durable.
